

Saint Berthevin (France) - GYS received the 2010 Innovation Award

Date: 11-15-2010 03:36 PM CET

Category: [Industry, Real Estate & Construction](#)

Press release from: [GYS](#)

The French industrial group GYS has received the 2010 innovation award from Group Auto Union for the 70HF12 and the 70HF24, its new range of battery chargers.

Bruno Bouygues, CEO of GYS declared: "As a manufacturer, we feel honoured to be the recipient of such a prestigious European award. At GYS, innovation is at the core of our culture and we devote a very significant amount of our turnover and our energy on new and cutting edge technologies. This award constitutes an important milestone for us as it reinsures us on our innovation strategy. We will continue to push forward technological boundaries so as to provide our clients with more technological products that can better serve them."

With Advanced Programming as well as Flexible Voltage technologies inside (the product can be used on electrical networks that support 85V to 285V), the 70HF-12 and the 70HF-24 are 70 Amp battery support units. Additional information can be found on our website : www.gys.fr

Group Description: With 420 persons and a 2010 expected turnover of 54M€, GYS is a French high tech industrial group that engineers, manufactures and distributes arc welding machines, automotive battery chargers and spot welding equipment. The group has its own industrial and commercial presences in 4 countries (France, Germany, UK and China) and is represented in 85 other countries.
